GLASIMO[®]

glass interiors

The company Glasimo combines the family glassmaking traditions with modern glass processing. The foundation of Glasimo is supported by 25 years of experience in the glass industry. Glasimo relies on the dynamic development of the company, starting from qualified personnel, ending with investing in the latest technologies that allow for the provision of services at the highest level.

The products offered by Glasimo include finished glass products such as balustrades, desks, tables, canopies, doors, facades, showcases, shower cabins, mirrors, cladding, floors, toilet partitions, glazing, stairs, lift shafts and washbasins.

Timeless Glass 8mm

Timeless glass is called self-cleaning glass due to its properties. Limescale and dirt do not stick to the glass. Water flows down faster, which also prevents the formation of streaks, making it easier to clean.

The glass is permanently protected against corrosion and as a result it does not change its colour and retains its attractive appearance. Water vapour evaporates much faster compared to standard glass.

Safety glass

Thermal-toughening increases its resistance to impacts and strength not only to mechanical factors but also to stresses related to surface temperature changes. The mechanical strength of toughened glass is 5 - 7 times higher than ordinary glass.

Configuration

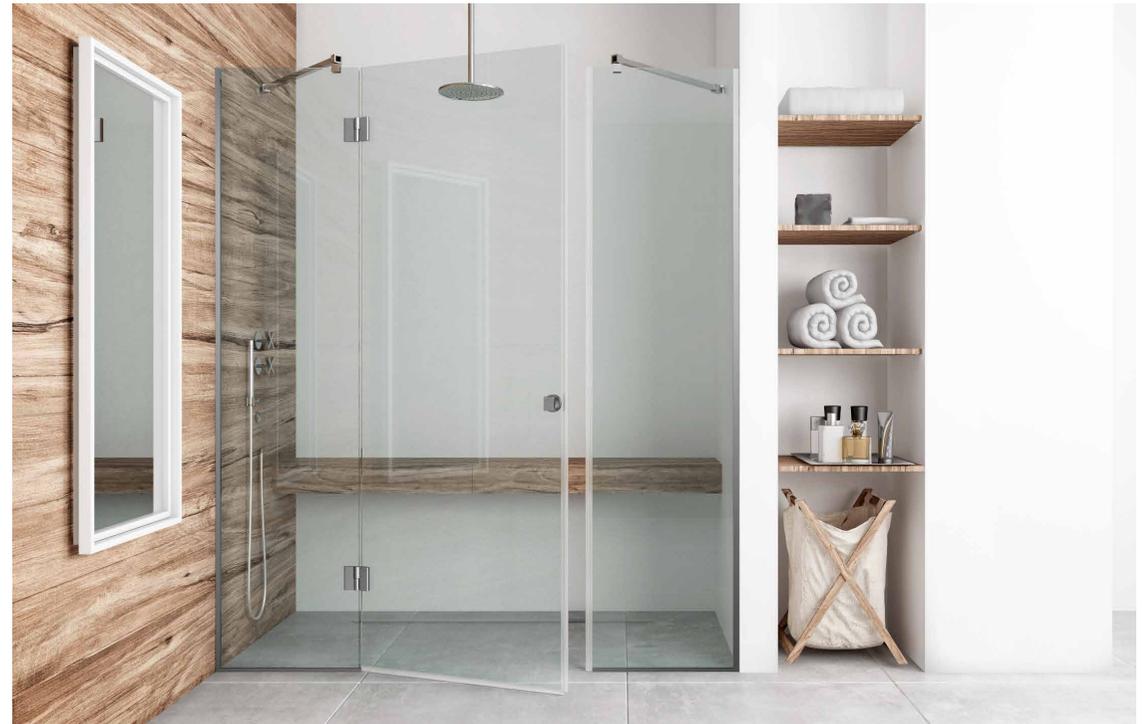

Authorised software Glasimo Configurator makes it possible to adjust the cabin to the interior of every bathroom. The personalised cabin creates a non-standard dimension, 11 glass variants, a wide range of accessories. The online configurator is available at the premises of Glasimo Partner Showrooms. The list of Partners is available from www.glasimo.pl

Flush fittings

New in the glass industry

Flush fittings constitute a high quality group of fittings for glass shower cabins. Thanks to their unique design, they take on very attractive shapes while maintaining practical applications such as resistance to water and moisture.

Flush hinges are perfectly complemented by the double-sided grip proposed by the Glasimo brand. The modern style of the fittings set is a proposal for those who appreciate good design in every details and extraordinary ideas in decorating a stylish bathroom.

Digital Print

Digital ceramic printing on glass

Innovative technology of multi-colour digital ceramic printing on glass. The printed area with a resolution of up to 720 dpi extremely precise, and after the hardening process, it is durable and resistant to damage. The maximum size of the printed template is 2800 x 6000 mm.

You will find many different printing proposals in our project database. We are open to your printing designs, because this technology allows you to produce a glass element with a custom designed pattern.

Digital printing on glass is used in products such as glass facade finish of buildings, glass balustrades, doors, glazing and shower cabins.

Technical requirements for the image:
File types: .jpg, .pdf, .AI, .EPS, TIFF
Resolution: min. 300 dpi

Screen printing

Screen printing with ceramic inks

The Glasimo brand has appropriate facilities for making modern screen printed decorations. Glass decorated by the screen printing method enriches the interior design and adds originality. It also works very well as a shower cabin ornament giving it individual character.

Our permanent offer includes a few basic designs that can be used for painting cabins, walls or glass bathroom doors. In addition to standard designs, we make decorations according to our clients' designs. The screen printing process requires the application of ink on smooth glass and permanent penetration of ink during toughening.

Glass decoration

Glass engraving brings in almost unlimited possibilities of glass decoration. The variety of motifs and forms as well as the shapes of engraving tools in combination with float glass, satinised glass or ornaments makes it possible to give shower cabins a very interesting appearance.

The combination of a matte and polished engraving imparts a three-dimensional appearance to the patterns made, and the cabins, in addition to their useful function, become a decorative element of the bathroom.

Enclosure installation methods

The shower cabin is the most important element of bathroom equipment. Depending on the desire to obtain aesthetic vision of the interior, it is worth considering the various variants of the cab's assembly, thanks to which the room will acquire a unique and modern character.

Installing the cabin on the shower tray

If the 90 cabin is installed on a shower tray, please remember that in reality the external dimension of the shower cabin will be smaller. It is conditioned by the installation method.

A' - external dimension of the cabin

B'- external dimension of the cabin

A - external dimension of the shower tray

B - external dimension of the shower tray

Installation of the shower cabin without a shower tray

If the 90 cabin is installed without a shower tray, please remember that the external dimension is the dimension of the outer glass edge.

A / A' - external dimension of the cabin

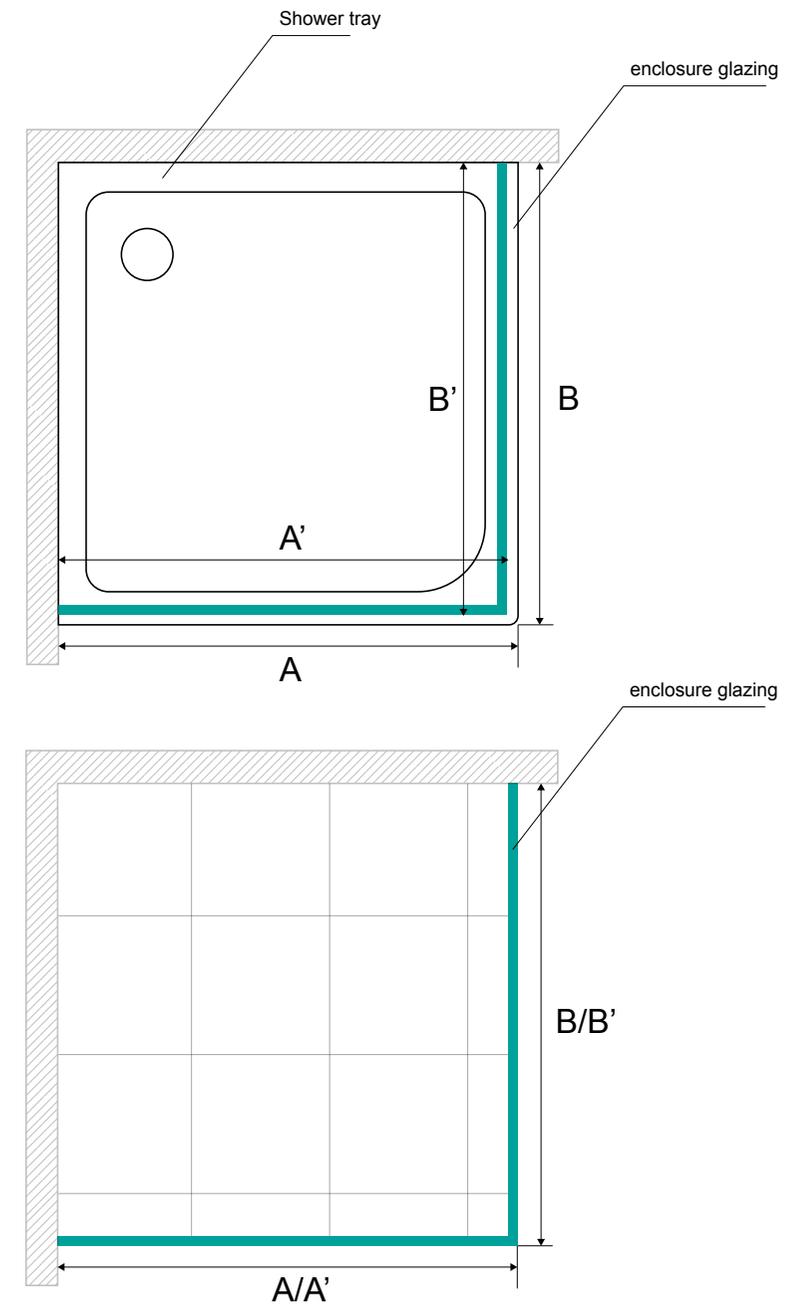

B / B'- external dimension of the cabin

Profile system allowing levelling of the wall curvature up to 5 mm

The cabin is additionally with the use of double-sided tape.

GLASIMO®

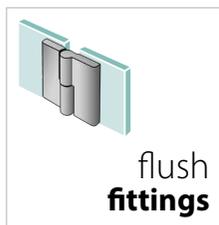

SHOWER CABINS

Glass shower cabins are a solution for discriminating customers. This is an interesting proposal that gives the room a sublime taste and transparency. During the installation process we are able to limit the fittings to the necessary minimum.

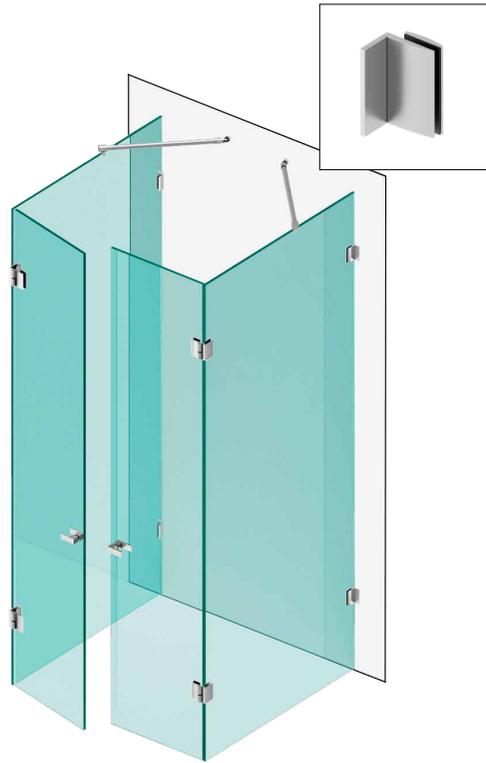

Sliding doors fixed on a fixed panel. Depending on the layout of walls, we can offer installation using a wall-glass hinge or a railing for the glass-glass installation.

When choosing a wall layout, remember to appreciate the practical aspect, thanks to which the glass cabin allows for tight protection of the wet bathroom part.

GLASI MO®

SHOWER SCREENS

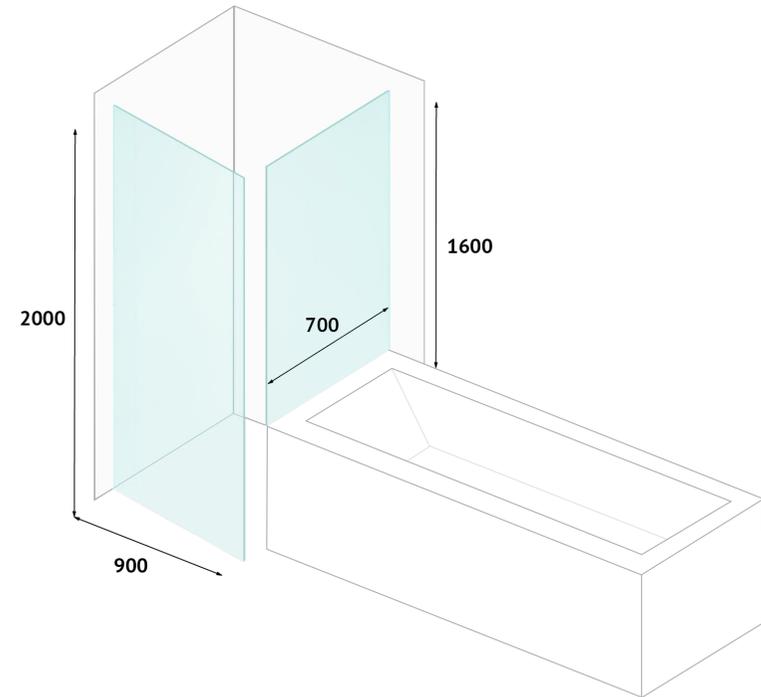

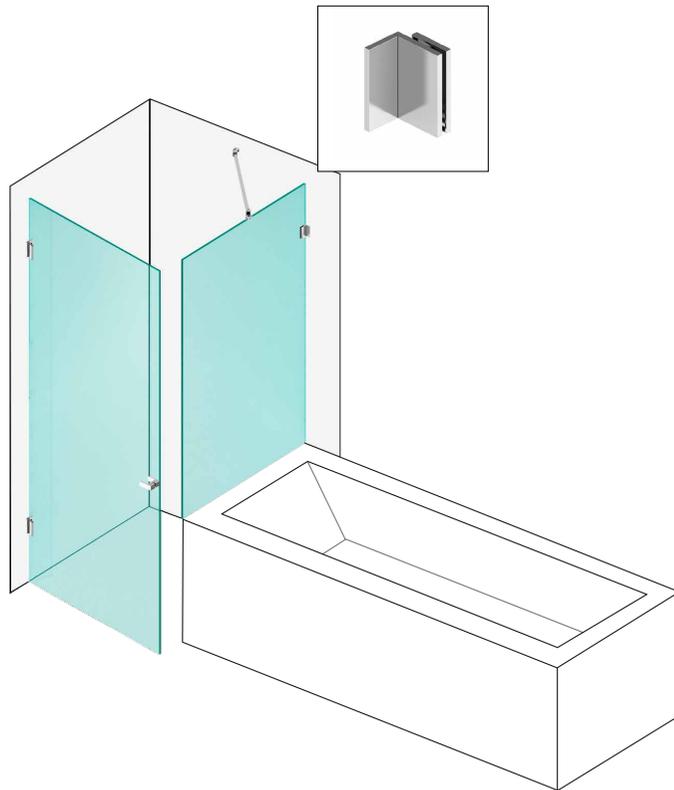

The bath screen is a compromise solution if due to the small space of the bathroom you want to have both a bathtub and a cabin at the same time.

The bath screen is also a perfect complement to the bathtub - thanks to the combination of a screen and a bathtub you can create a bathing place with a shower place.
