## Timeless glass 8 mm

**Timeless glass** is called self-cleaning glass due to its properties. Limescale and dirt do not stick to the glass. Water flows down faster, which also prevents the formation of streaks, making it easier to clean.

The glass is permanently protected against corrosion and as a result it does not change its colour and retains its attractive appearance. Water vapour evaporates much faster compared to standard glass.

## Toughened glass

**Thermal-toughening** increases its resistance to impacts and strength not only to mechanical factors but also to stresses related to surface temperature changes. The mechanical strength of toughened glass is 5 - 7 times higher than ordinary glass.

## Konfigurace

Authorised software **Glasimo Configurator** makes it possible to adjust the enclosure to any bathroom interior. The personalised enclosure creates a non-standard dimension, 11 glass variants, a wide range of accessories to choose from. The on-line configurator is available on the premises of Glasimo Partner Showrooms. The list of Partners is available at [www.glasimo.eu](http://www.glasimo.eu)

Glass decoration

Glass shower enclosures are a solution for discriminating customers. This is an interesting proposal that gives the room a sublime taste and transparency. During the installation process we can limit the fittings to the necessary minimum.

Sliding doors are fixed on a fixed panel. Depending on the layout of walls, we can offer installation using a wall-glass hinge or a railing for the glassglass installation.

The recess door is an exclusive variant of the shower enclosure recess. It provides a solution for a practical shower space.

The shower door can be divided into: hinged - single- or double-leaf, sliding - the door is mounted on a sliding system, an accordion door - a bifolding door.

# ACHILLE

Shower enclosures with the use of permanent walls will ensure your bathroom a modern and unique feel. The variety of solutions that Glasimo offers, assure you the ease of designing your individual bathroom.

We'll help you to adjust the shape and size of the shower enclosure. Usually the glass is mounted with the help of fittings, the profile is installed in the floor and in some situations also on the wall.

As the enclosed walk-in cabins are made all from glass they are very spacious and clear-view.

**GIOVANNI**

On-bath mounted screens are a compromise solution for the ones that want a bath and a cabin in the bathroom but there is not enough space for both.

Screens mounted on the bathtub are appropriate both for the relaxing baths lovers and the ones that like quick showers. Also a clever solution is to acquire a model with a pair of wings to fold them inside which will add even more functionality to the product.

Over that, a on-bath screen is also a great solution because of the fact that it ensures you showering cabins practicality inside the bath.
